# FORGED PRODUCTS

## MADE TO MEASURE

WE FIND SOLUTIONS. SO THAT YOU CAN BE SUCCESSFUL.

We manufacture forged parts according to the drawing in various shapes and dimensions - also in small series. Any contours can be created using our CNC firing systems. Dies and fixtures are designed and manufactured in our own tool shop. Of course, we also deliver our products pre-processed or finished. We process all common materials and manufacture according to the specifications of our customers.

### Materials & Finished Products

- General structural steel, St52, C45
- Stainless steel
- Up to high-alloy tool steel and special alloys
- Manganese high carbon steel

### Customer Specifications and Working Principles

- CAD Data
- Drawing (pre- and finished)
- Delivery instruction
- Regulations

### Forging Machines

- 10 MN open die forging press with rail-bound manipulator (load capacity 12 t)
- 2,500 kg bridge hammer for freeform and drop forgings
- 650 t screw press for upset parts
- 700 t bending and straightening press for curved products

### Finished Products

- Open die forgings
- Perforated rings
- Forged washers
- Stepped waves
- Art forged bars
- Curved forged products
- Forged products with firing contours
